

Revolutionary high speed spindles

TBV1304

- Driven by through coolant or oil
- Rotation speeds 40.000 – 75.000 rpm

Features

- Affordable pricing
- Adjustable angle
- Coolant/oil pressure 10 - 60 bar
- Perfect dynamic run out always
- Supports tool shanks 3, 4 and 6 mm

Advantages

- Crush resistant
- Extended tool life
- Super high precision
- Significant savings on your machining costs

Applications

- Milling • Drilling • Grinding
- Chamfering • Engraving • Etc.

Industries

- Aviation • Automotive • Micromachining
- Medical • Mold & Die • Electronics • Etc.
